PC GOLD LTD INVESTOR PRESENTATION

FEBRUARY 2026

PC Gold Limited ACN 609 609 047
ASX:PC2 FSE: D6A

PROLIFIC GOLD REGION
SUBSTANTIAL GOLD RESOURCE POTENTIAL
GRANTED MINERAL LEASE
ENVIRONMENTAL APPROVAL

INVESTMENT HIGHLIGHTS

IPO Objectives Exceeded – New Growth Targets Identified

Expanded focus on resource growth - High grade UG targets and additional Open Pit Targets warranting added work

Robust 821 Koz Au Mineral Resource (424 koz Au Indicated)¹

Resource updates during 2026 - Photon Assay unlocking true grade.

1-2 Moz Au Exploration Target Being Validated¹

New discoveries since IPO - Following up top tier early-stage exploration.

Feasibility Study – Targeting Long Mine Life

Maiden ore reserves, OP and UG mine plan and standalone CIL plant.

Permitted Project

Open-pit mining and processing via UR, Early works including degrubbing and Grade control drilling, Heritage and Native Title, Drill Permitting.

Experienced Board, Management & Technical Team

Proven discovery and development credentials – Own ~40% of PC2 today.

1 - Refer to the PC Gold IPO Prospectus lodged with ASIC and dated 13 August 2025 (as amended by the Supplementary Prospectus lodged with ASIC and dated 10 September 2025) for further information on the mineral resource estimation and JORC exploration targets

SPRING HILL GOLD PROJECT

SPRING HILL WITHIN PINE CREEK GOLDFIELD

- **+20 Moz Pine Creek goldfield**, Northern Territory - a world-class gold province.
- **Three new CIL plants** permitted for construction in the past 18 months. **Idle 2.4Mt pa Union Reef plant 26km by road.**
- **Established regional infrastructure**, with proximity to Darwin, Katherine and Pine Creek, supporting workforce availability, services and accommodation.
- Major participants in the region:
 - **Agnico Eagle** – 3Moz and the Union Reef CIL Plant. C & M.
 - **Vista Gold** – 10.5Moz Mt Todd. Feasibility completed pending FID
 - **Hanking** – 3Moz Rustlers Roost. Feasibility completed pending FID
 - **Patronus Resources** – 1Moz (Free milling and poly metallic)
- **PC Gold - Spring Hill Gold Project**,
 - Comprising a 1.035ha ML, surrounded by a 3,542Ha EL.
 - The existing **JORC Resource (June 2024) of 821,000oz Au (424,000oz Au Indicated)** is constrained to only 1.1km of strike.
 - 1 – 2 Moz Exploration Target¹ covering an additional 2km of strike
 - Recent discoveries have added high-grade underground and open pit potential to the project, subject to ongoing drilling.

¹ - Refer to the PC Gold IPO Prospectus lodged with ASIC and dated 13 August 2025 (as amended by the Supplementary Prospectus lodged with ASIC and dated 10 September 2025) for further information on the mineral resource estimation and JORC exploration targets

SPRING HILL GOLD PROJECT

SOLID FOUNDATION, REAL GROWTH AHEAD

- **High-grade, sheeted vein system** consistent with major deposits in the Pine Creek gold field.
- **Multi-Zone System Ready for Expansion** four key zones defined across a +5km mineralised corridor to the North of the current MRE.
- **Bulk Tonnage Open Pit / Underground (Feasibility Study)**
 - **JORC Resource (June 2024) of 821,000oz Au**, including **424,000oz Au Indicated**. First stage resource definition completed. Second stage underway. Material increase in assays
- **High Grade UG Potential (Outside previous mine plan)**
 - Historical Spring Hill UG mining Centre – 20koz at 30g/t Au. Adit being re-opened to assess further
 - **Hong Kong / Macau Link Zone** - New discovery. 25m @ 36 g/t Au along with four other holes with broad VG. Assays pending.
- **Additional Open Pit Targets (Exploration Target Validation)**
 - **Lasagne lode**. 26 holes have already been drilled this season over 1.2km of additional strike seeking to validate an Exploration Target of between 4.8 – 9.1Mt at 1.0 – 1.2gpt Au for between **183.000 - 350,000ozs Au..**
 - **North Target Zone** - hosts a potential repeat of the Hong Kong / Macau Zone along the structural corridor. An Exploration Target of between 17.5 – 24Mt at 0.7 – 1.1gpt Au for between **384.000 - 905,000ozs Au** that is supported by historical wildcat drill holes. This target is to be followed up in the 2026 dry season.

Cautionary Statement

The Exploration Target has been prepared and reported in accordance with the 2012 edition of the JORC Code. The potential quantity and grade of the Exploration Target is conceptual in nature. There has been insufficient exploration to estimate a Mineral Resource. It is uncertain if further exploration will result in the estimation of a Mineral Resource.

SPRING HILL GOLD PROJECT

A ROBUST PLATFORM FOR GROWTH

The Heart of Spring Hill's MRE

The **Hong Kong zone** is one of five zones within the **MRE zone** and hosts a majority of the current MRE ounces — a near-vertical ore body with a strike length of **1.1km** and widths averaging 50–60m.

Hong Kong remains open down plunge and at depth along strike

Diamond drilling underway will seek to further expand the MRE and infill the inferred resource area for delivery of a maiden reserve in 1H 2026.

COG	Indicated			Inferred			Total		
	Tonnes (Mt)	Au g/t	Oz Au	Tonnes (Mt)	Au g/t	Oz Au	Tonnes (Mt)	Au g/t	Oz Au
0.3	19.4	0.8	508,000	19.2	0.8	484,000	38.6	0.85	992,000
0.5	13.0	1.0	424,000	12.6	1.0	397,000	25.6	1.0	821,000

PHOTON ASSAY / MET PROGRAMS

Photon Assay results support potential grade upside across the MRE and exploration targets

Potential Grade Under Call

- PC Gold has conducted a substantial amount of historical Screen Fire Assay (~10% of the DHDB) and metallurgical programs on the Spring Hill ore zones
- Evidence of **coarse gold not fully captured by conventional fire assay**, particularly outside the oxide zone
- Difference between fire assay to reconciled met grade is **potentially material**, with **coarse gold recovered** in metallurgical test work via gravity in **all cases**

Bulk Sample Metallurgical Program

13,250t bulk sample of mullock and free-dig ore processed at Union Reef over three days:

- Screen fire assay grade: 1.66g/t Au
- Reconciled recovered grade: 2.33g/t Au
- +45.6% uplift**, attributed to **coarse gold**
- 36.1% gravity gold recovered using a single-stage Nelson concentrator (38 micron grind)

Implications for future

MRE's

- Larger sample mass improves **representation of coarse gold** in grade estimation
- Potential for **higher average grades** in parts of the current MRE
- Conversion of LG waste tonnes to ore**
- Rapid assay** turnaround supports faster resource updates and decision-making

Photon Assay Re-Assay Program

- Re-assay of **~1,000 m of historical core** from the main resource area
- Covers >10% of the MRE database** and **>20% of the Hong Kong lode**
- Remaining half core previously assayed using conventional methods
- Average grade increase of ~55%** for samples below **2.5 g/t Au**

Lab/Domain	Fire Assay Au g/t	Screen Fire Assay Au g/t	Met Au g/t	% Difference	Gravity Recovery %	Overall Recovery %
Nagrom (HK)	1.28	1.61	2.16	69%	70.6%	N/A
Gekko (HK)	1.28	1.75	3.21	151%	58.7%	95.9%
Nagrom (Smaller Pits)	4.11	5.31	6.45	57%	59.8%	98.3%
Gekko (Smaller Pits)	4.11	6.55	7.37	79%	65.9%	96.4%
NAL (Mullock)	3.10	3.9	6.55	111%	N/A	94.5%
ALS (Mullock)	1.41	1.92	2.5	77%	31.6%	98.1%

SPRING HILL GOLD PROJECT

MACAU RESOURCE DEFINITION DRILLING EXCEEDING EXPECTATIONS

Phase 1 Resource Definition Drilling Results / More than 3,500 assays still pending

- 26 drill holes for 7,137m completed targeting mineralisation immediately beneath the planned open pit:
 - **31m @ 1.92g/t Au** from 75 mdh including **11m @ 3.33 g/t Au** (SRD25-023 – Macau)
 - **14m @ 3.55 g/t Au** from 243 mdh including **4.84m @ 9.03 g/t Au** from 252.16mdh (SDH25-19a – Macau)
 - **8m @ 3.97 g/t Au** from 15 mdh including **5m @ 5.48 g/t Au** from 17 mdh (SRD25-024 – Macau)
 - **25m @ 2.32 g/t Au** from 385 mdh including **13.5m @ 4.08 g/t Au** from 396.5 mdh (SDH25-022 – Macau)
 - **10m @ 1.42g/t Au** from 130mdh (including **3.8m @ 3.22 g/t Au**), **3.9m @ 3.74g/t Au** from 165.9mdh and **11m @ 4.16g/t Au** from 174mdh (including **1m @ 42.37 g/t Au** (SDH25-017 – Macau)
 - **3m @ 2.8 g/t Au** from collar and **6m @ 1.0g/t Au** from 17mdh (Hong Kong), then **13m @ 1.1 g/t Au** from 133mdh (including **1m at 8.30 g/t Au** from 138m) and **B** from 163mdh (SRD25-022 - Macau)

SPRING HILL GOLD PROJECT

RE OPENING OF HISOTIRCAL UNDERGROUND MINE ADIT

- Approvals secured to **re-open the historical Spring Hill underground adit that extends approximately 427m and transects the Eastern, Middle and Main Lodes** of mineralisation
- **Underground access enables the rapid assessment of high-grade mineralisation via underground drilling from the adit and bulk sample studies.**
- Adit provides access to the base of the historical Spring Hill underground workings, which **recorded historical production of approximately 21,170 ounces of gold at an average recovered grade of ~30g/t Au.**
- Significant historical drilling results proximal to the adit include:

3m @ 21.02 g/t Au	11m @ 4.41 g/t Au
8m @ 9.50g/t Au	4m @ 9.14 g/t Au
10m @ 4.68 g/t Au	5m @ 2.95 g/t Au
- Significant historical drilling in the Main Lode to the south of the adit intersected:

15.00m @ 10.56 g/t Au	11.00m @ 5.19 g/t Au
6.40m @ 7.01 g/t Au	5.0m @ 6.17g/t Au
- The adit was previously mapped in detail in 1994 by Ross Mining NL, with material channel samples across the adit backs returning:

1m @ 63.2g/t Au, 1m @ 9.48 g/t Au (Middle Lode)
1m @ 14.5 g/t Au (Middle Lode)
0.8m @ 13.9 g/t Au (Eastern Lode)

SPRING HILL GOLD PROJECT

MACAU / HONG KONG HIGH GRADE LINK ZONE DISCOVERED

Phase 1 Resource Definition Drilling Results

- **The Macau Link Zone has now been tested by five diamond holes over a 225m strike length**, with all holes intersecting visible gold within a hematite–magnetite unit traceable from hole to hole.
- The Macau Link Zone remains open in all directions with follow-up drilling proposed as a priority to extend this zone both up and down dip and along strike.
- **SDH25-028 is the first hole to be reported and returned 25m @ 36.83 g/t Au from 283 meters down hole (mdh), including 2m @ 444.3 g/t Au from 304mdh.**
- These assay results represent the highest-grade bulk tonnage intercepts recorded at Spring Hill to date, positioned below the planned open pit and near the recently announced historical underground adit.
- An additional five historical holes on the perimeter of the Link Zone all returned elevated grades.
- Adit extension to the west to assess UG access to this zone to be assessed.

SPRING HILL GOLD PROJECT

NEW MACAU EXTENSION IDENTIFIED IN PHASE 1 STEP OUT DRILLING

Phase 1 Drilling Results

- No historical drilling has been recorded in the Macau Extension.
- Drilling intersected three mineralised lodes over more than 300 metres of strike and across a 30–40 metre wide zone that remains open along strike.
 - **SRD25-002:** 10m @ 1.73 g/t Au from 149 mdh including **4m @ 3.76 g/t Au** from 155 mdh.
 - **SRD25-003:** **4m @ 2.90 g/t Au** from 130 mdh, 3m @ 1.26 g/t Au from 153 mdh and **3m @ 3.27 g/t Au** from 176mdh (See Figure 3).
 - **SRD25-004:** **5m @ 4.02 g/t Au** from 124 mdh, 2m @ 1.95 g/t au from 137 mdh and 12m @ 0.8g/t Au from 193 mdh.
- The Macau Extension Target demonstrates the potential to define a new bulk-tonnage zones at Spring Hill, immediately along strike from the existing MRE, for potential inclusion in future MRE updates.
- Ten in-fill holes have been completed, with a further ten holes planned subject to assay results. Maiden Indicated Resource target.
- Extensional drilling also being planned to investigate the northern strike extent,

SPRING HILL GOLD PROJECT

2026 WORK PROGRAM

DRILLING

Three rigs currently operating (two Diamond, one RC), driving rapid resource growth and resource conversion. More to be added.

Resource definition and infill program for ~7,000m completed across the **Hong Kong and Macau Sheeted Vein lodes**, targeting **Inferred to Indicated conversion** (exceed expectations so far)

Phase 2 Resource Definition program underway targeting the West Lode anticline target – this sits within the southern end of the proposed pit shell.

Macau Link Zone to be prioritised following VG and assay results.

Infill drilling at the Macau Extension Zone (discovered late 2025) confirms mineralisation consistent with existing sheeted vein lodes (**>86% of the MRE**), supporting a **maiden resource in 1H 2026**.

Strong results from the Lasagne and Eastern Extension Zones, both immediately along strike from the 821 koz Au resource. Follow up programs planned on both zones for maiden resource

Northern Zone maiden campaign to start in mid 2026 - validation of the exploration target

RESOURCE UPDATE

Updated Mineral Resource Estimate targeted for mid-2026, underpinning a **long-term mine plan** for Spring Hill

New inputs to be considered / incorporated:

- **~1,000 historical Screen Fire Assays (SFA)**, primarily in the indicated portion of the MRE
- **~ 900 samples re-assayed using Photon Assay** in the Hong Kong lode, delivering a **~55% increase in average grade for samples below 2.5g/t Au**
- **Results from phase 1 Resource Definition drill holes completed**, targeting conversion of Inferred to Indicated Resources in the Macau and Hong Kong lodes
- **New Macau Extended Zone identified**, providing additional upside potential
- The current MRE was prepared using a conservative **0.5 g/t Au cut-off** and a gold price of **A\$2,900/oz**. Sensitivity analysis indicates a **~13Mt (52%)** increased in mineralised material at a 0.3gpt Au cut-off.

FEASIBILITY STUDY WORK

Processing plant at PFS level; remaining workstreams advancing to DFS

Key work programs underway:

1. Geotechnical studies for the updated open pit design
2. Metallurgical test work, including grind size optimisation
3. Maiden Ore Reserves
4. CIL plant design (including tailings) and costing
5. Power supply studies (mains power vs hybrid)
6. Water Source assessment
7. Environmental surveys (flora and fauna updates)

UNDERGROUND / HIGH GRADE POTENTIAL

Approval granted to re-open the historical underground adit, creating a new high-grade exploration opportunity

Early underground access (120m below surface) provides the ability to assess the high grade zones beyond the current open pit plan

Planned works:

- Re-open adit and install perimeter fencing
- Entech engaged to complete a structural integrity assessment
- Assessment of high-grade targets and drill cuddy locations
- Drive the adit west through Hong Kong and Macau zones

The adit is located at the Northern end of the resource and is distinct from the previously planned UG on the southerly plunge to the Hong Kong zone.

APPENDIX 2 - DE-RISKED AND READY

TENURE, PERMITTING & INFRASTRUCTURE

1

SECURE TENURE WITH LONG MINE LIFE

Large 1,035Ha, granted
Mineral Lease (renewed in Jan
2025 for 21 years)

Surrounded by a 3,542Ha
Exploration Licence

Pre-Native Title grant - **no ILUA
required**, no annual ML
expenditure commitments

Option to reduce royalty to
3.27% NSR - held by RIVI /
Franco Nevada

2

PERMITTING FRAMEWORK LARGELY IN PLACE

Fully permitted for open-pit
mining through third-party toll
treatment

Variation for **standalone
processing plant** to be fast-
tracked under NT's new
environmental regime

Open dialogue with the NT
Government and EPBC to
define the pathway for
variations to our permitting if
required.

3

FAVOURABLE LOGISTICS & UTILITY ACCESS

Project is **10km off the Stuart
Highway**, accessed by all-
weather public road

66kV power substation <4km
from potential plant site

Mains gas pipeline runs through
the tenement (east of Spring Hill)

Deep aquifer water source

Flat terrain west of the MRE
provides ideal ground for **plant**
and **tailings infrastructure**

4

LOCAL SUPPORT & WORKFORCE INFRASTRUCTURE

Pine Creek township just 30
minutes away

Multiple accommodation
options, including:

100-person camp (Agnico
Eagle)

Former 300-person Territory
Iron camp

Hotels, fuel stations, and
motel-style units

Note:

1. PC Gold has a royalty buy back right to acquire 2% of the NSR royalty. This option is for 3 years and the buy back will cost \$24M , if exercised. An option fee of \$750,000 is payable within 26 months of IPO for this right.

APPENDIX 1 – RESOURCE AND EXPLORATION TARGETS

A breakdown of the Spring Hill Mineral Resource Estimate by category and various Cut Off Grades (**COG**) is as follows:

COG	Indicated			Inferred			Total		
	Tonnes (Mt)	Au g/t	Oz Au ('000)	Tonnes (Mt)	Au g/t	Oz Au ('000)	Tonnes (Mt)	Au g/t	Oz Au ('000)
0	21.1	0.7	505	22.3	0.7	503	43.4	0.7	1,008
0.3	17.6	0.9	483	19.2	0.8	482	36.8	0.8	966
0.5	13.0	1.0	424	12.6	1.0	397	25.6	1.0	821
0.7	8.6	1.2	341	7.3	1.3	295	15.9	1.2	636

Notes:

1. Figures may not add up due to rounding.
2. All Mineral Resources are classified as Indicated and Inferred.
3. All Mineral Resources have been depleted by surface trial mining and Underground Adits.
4. Grade Capping has been applied to high grade outliers. Each domain has been capped based on their unique geology and grade distribution.
5. No minimum mining SMU parameters applied to the Mineral Resources.
6. The average bulk density is assigned based on average mean values by weathering type: oxide = 2.57 g/cm³; transition = 2.69 g/cm³; Fresh = 2.77 g/cm³.
7. The Mineral Resource was estimated in accordance with the JORC Code

A breakdown of the Spring Hill Exploration Target is as follows:

Prospect	Tonnes Range (Mt)		Grade Range (g/t)		Contained Gold (koz)	
	Low	High	Low	High	Low	High
Zbony Trend	1.5	4	0.5	1	24	127
Vein Heaven	8	11	0.7	1.1	180	389
Steve's Gully	8	11	0.7	1.1	180	389
Northern Extension to Resource	4.8	9.1	1.0	1.2	183	350
TOTAL	22.3	35.1	0.7	1.1	567	1,255

Cautionary Statement

The Exploration Target has been prepared and reported in accordance with the 2012 edition of the JORC Code. The potential quantity and grade of the Exploration Target is conceptual in nature. There has been insufficient exploration to estimate a Mineral Resource. It is uncertain if further exploration will result in the estimation of a Mineral Resource.

Two key areas excluded from quantification of exploration targets:

1. the potential increase in grade of the mineral resource estimation on the basis of the upgrade observed from fire assay versus screen fire assay methods where this is extensively documented.
2. the exploration target was derived from fire assay which similarly has the potential upgrade associated with utilisation of screen fire assay versus fire assay methods.

When exploration was being conducted by PC and its predecessors, photon assay methods were either not available or in its infancy. Photon assaying method is a non-destructive method, utilising a 500g sample size whereas fire assay utilises 50g sample size. With the coarse grain nature of the gold at Spring Hill, larger sample sizes are required in order to ensure that the sample taken is representative of the mineralisation

DISCLAIMER & COMPETENT PERSONS STATEMENT

IMPORTANT NOTICE AND DISCLAIMER

The following important notice and disclaimer applies to this investor presentation and you are therefore advised to read this carefully before making any use of this presentation or any information contained in this presentation.

This presentation has been prepared by PC Gold Limited ACN 609 609 047 (PC Gold or the Company) to provide summary information about PC Gold and their activities as at the date of this presentation. The information in this presentation is of a general nature and does not purport to be complete and may change without notice. This presentation is not a recommendation to buy Shares and undue reliance should not be placed on the information or opinions contained in this presentation for investment purposes as it does not consider your investment objectives, financial position or needs. These factors should be considered, with professional advice, when deciding if an investment is appropriate.

Forward-Looking Statements

This presentation includes forward-looking statements that reflect PC Gold's intentions, beliefs, targets, aspirations or current expectations concerning, among other things, PC Gold's results of operations, financial condition, liquidity, revenue growth, performance, prospects, growth, strategies and the industry in which PC Gold operates. These forward-looking statements are subject to risks, uncertainties and assumptions and other factors, many of which are beyond the control of PC Gold. PC Gold cautions you that forward-looking statements are not guarantees of future performance and that its actual results of operations, financial condition, liquidity, performance, prospects, growth or opportunities and the development of the industry in which PC Gold operates may differ materially from those made in or suggested by the forward-looking statements contained in this presentation. In addition, PC Gold does not guarantee any rate of return or the performance of PC Gold nor does it guarantee the repayment or maintenance of capital or any particular-tax treatment. In particular, PC Gold does not make any representation that it will achieve its targeted revenue growth outlined in this presentation and notes that the illustrative revenue profiles are intended to demonstrate the potential way that the Company could achieve revenue growth and are not representations or forecasts of that growth. Investors should note that past performance may not be indicative of results of developments in the future periods and cannot be relied upon as an indicator of (and provides no guidance as to) PC Gold's future performance. PC Gold, its related bodies corporate and each of their respective directors, officers and employees expressly disclaim any obligation or undertaking to review, update or release any update of or revisions to any forward-looking statements in this presentation or any change in PC Gold's expectations or any change in events, conditions or circumstances on which these forward-looking statements are based, except as required by applicable law or regulation. Subject to any continuing obligation under applicable law or any relevant listing rules of the ASX, PC Gold disclaims any obligation to disclose any updates or revisions to any forward-looking statements in these materials to reflect any change in expectations in relation to any forward-looking statements or any change in events, conditions or circumstances on which any statement is based. Nothing in these materials shall under any circumstances create an implication that there has been no change in the affairs of PC Gold since the date of this presentation.

General

In this Presentation references to 'PC Gold', 'PC Gold Group', 'the Group', 'we', 'us' and 'our' are to PC Gold and (where applicable) its controlled subsidiaries and entities. All dollar values are in Australian dollars (A\$) unless noted. A number of figures, amounts, percentages, estimates, calculations of value and fractions in this presentation are subject to the effect of rounding. Accordingly, the actual calculation of these figures may differ from the figures set out in this presentation

Summary information

This presentation contains summary information about PC Gold and its activities, which is current as at the date of this presentation. The information included in this presentation is of a general nature and does not purport to be complete nor does it contain all the information which a prospective investor should consider when making an investment decision. Each recipient of this presentation should make its own enquiries and investigations regarding all information in this presentation including but not limited to the assumptions, uncertainties and contingencies which may affect further operations at PC Gold and the impact that different future outcomes may have on PC Gold. This presentation has been prepared without taking account of any person's investment objectives, financial situation or needs. Before making an investment decision, prospective investors should consider the appropriateness of

the information having regard to their own objectives, financial situation and needs, make their own assessment of the information and seek legal, financial, accounting and taxation advice appropriate to their jurisdiction in relation to the information and any action taken on the basis of the information. The information included in this presentation has been provided to you solely for your information and background and is subject to updating, completion, revision and amendment and such information may change materially. DISCLAIMER & COMPETENT PERSONS STATEMENT (cont.)

COMPETENT PERSONS STATEMENT – RESOURCES

The information in this presentation that relates to the estimation and reporting of Mineral Resources is based on information compiled by Mr. Brian Fitzpatrick of Cube Consulting. Mr. Fitzpatrick is a member of the Australasian Institute of Mining and Metallurgy (MAusIMM CP) and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration, and to the activity which he is undertaking, to qualify as a Competent Person (CP) as defined in the 2012 Edition of the Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the PC Gold Ltd Mineral Resource Estimate, Spring Hill Gold Project, Northern Territory, Australia — JORC Code).

Mr. Fitzpatrick has worked as a professional geologist for more than 37 years. Relevant experience has been gained from working in the gold and base metal mining and exploration industry in various provinces throughout Australia and other countries. This includes exploration, open pit and underground mining experience in greenstone-hosted gold deposits, epithermal gold deposits, and Volcanogenic Massive Sulphide (VMS) polymetallic deposits.

Cube specialises in Mineral Resource estimation, evaluation, and exploration. Both Cube and Mr. Fitzpatrick are independent from PC Gold. The relationship is solely one of professional association between client and independent consultant. This report has been prepared in return for fees based upon agreed commercial rates, and the payment of these fees is in no way contingent on the results of this report.

Mr. Brian Fitzpatrick is a full-time employee of Cube and is the Competent Person (CP) responsible for the resource estimation and completion of JORC (2012) Table 1, Section 3. Mr. Fitzpatrick has not visited the Spring Hill Project or undertaken an independent verification of the data supplied pertaining to this project. However, he completed data validation and a compilation and review of all available documentation from the NT GEMIS website.

Responsibility for data compilation, data verification, and exploration results lies with PC Gold. Completion of JORC (2012) Table 1, Sections 1 and 2 was undertaken by Mr. Geoffrey Eupene of Eupene Exploration Pty Ltd and PC Gold staff. Mr. Eupene oversaw most of the drilling completed from 1992 to 1995 for Ross Mining and Billiton, and also led the geophysics and deep diamond drilling collaboration program in 2022–2023 (Eupene, 2023).

COMPETENT PERSONS STATEMENT – EXPLORATION TARGET

The information in this Presentations that relates to Exploration Targets is based on, and fairly represents, information and supporting documentation compiled by Mr Robert Wason BSc (Hons) Geology, MSc (Mining Geology), a Competent Person who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Wason is an employee of Mining Insights. Mr Wason has sufficient experience that is relevant to the Technical Assessment of the Mineral Assets under consideration, the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Practitioner as defined in the 2015 Edition of the "Australasian Code for the Public Reporting of Technical Assessments and Valuations of Mineral Assets" (VALMIN, 2015), and as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC, 2012).

Mr Wason consents to the inclusion in this Presentation of the matters that are based on and fairly represent information and supporting documentation prepared by him in the form and context in which it appears. The information in this report that relates to estimation and reporting of Mineral Resources is based on, and fairly represents, information compiled by Mr. Brian Fitzpatrick of Cube Consulting. Mr. Fitzpatrick is a member of the Australasian Institute of Mining and Metallurgy (MAusIMM CP) and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person (CP) as defined in the 2012 Edition of the 'Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'.
